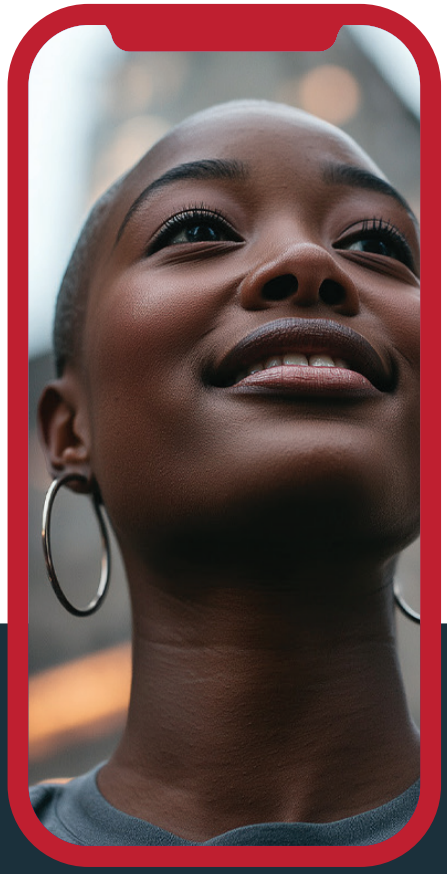
Cancer Risk Assessment and At-Home Testing

Understanding individual risk and knowing what to do next



Cancer can be hard to think about, but understanding personal risk can help people make more informed decisions about their health.

Cancer Risk Assessment gives Members a personalised view of their risk across six common cancers, with guidance on relevant NHS screening and the steps they can take. Where included, at-home tests and dedicated clinical support are also available.

The Need
Cancer risk is personal, yet many people do not understand their individual risk, the screening available to them or the steps they can take.

The Service
A personalised digital risk assessment across six common cancers, with relevant NHS screening guidance and access to at-home testing where included. If a test identifies an abnormal result, a Cancer Nurse Specialist provides dedicated support and guidance on next steps.

The Difference
A more complete journey from understanding risk to taking action. Members get personalised information, testing where available, and clinical support if a result needs further attention.

Wellbeing Service

For Your Clients
A proactive approach to cancer support that helps people understand their risk, engage with appropriate screening and take informed next steps, with clinical expertise when needed most.

Get In Touch
Talk to us about how Cancer Risk Assessment and At-Home Testing fits your clients' Workforce Health Plan. We're here to help you position it clearly and accurately.

This non-insurance service is provided by a third-party supplier and may be withdrawn or amended independently of the insurance policy.

Provided by Harley Street Concierge Limited, trading as Reframe.
